

Record With ResQ • Submit With MedHub

Trainees can now record work hours automatically. Simply sign in to the ResQ app once and let it do the work. The ResQ app automatically senses arrival and departure from any hospital and records those hours. If you are an existing MedHub customer, the recorded hours automatically sync to the trainees Work Hours module within MedHub.

ResQ eliminates the administrative burden associated with work hour reporting. **Administrators** can now focus their daily efforts on other tasks because ResQ eliminates the process of data entry and provides real-time visibility of trainees hours to aid with compliance.

Record automatically upon entry and exit.

View work hours in real-time.

Sync across platforms directly to MedHub.

Learn more, document less.
